Informational Meeting February 16, 2017

What can I expect if I live or work nearby?

- You may receive a request for Pre-Blast Inspection
- You may feel vibrations or hear noise from blasts
- You may receive a request to have a seismograph placed on your property

Pre-Blast Inspection

Inspect structures nearest the project

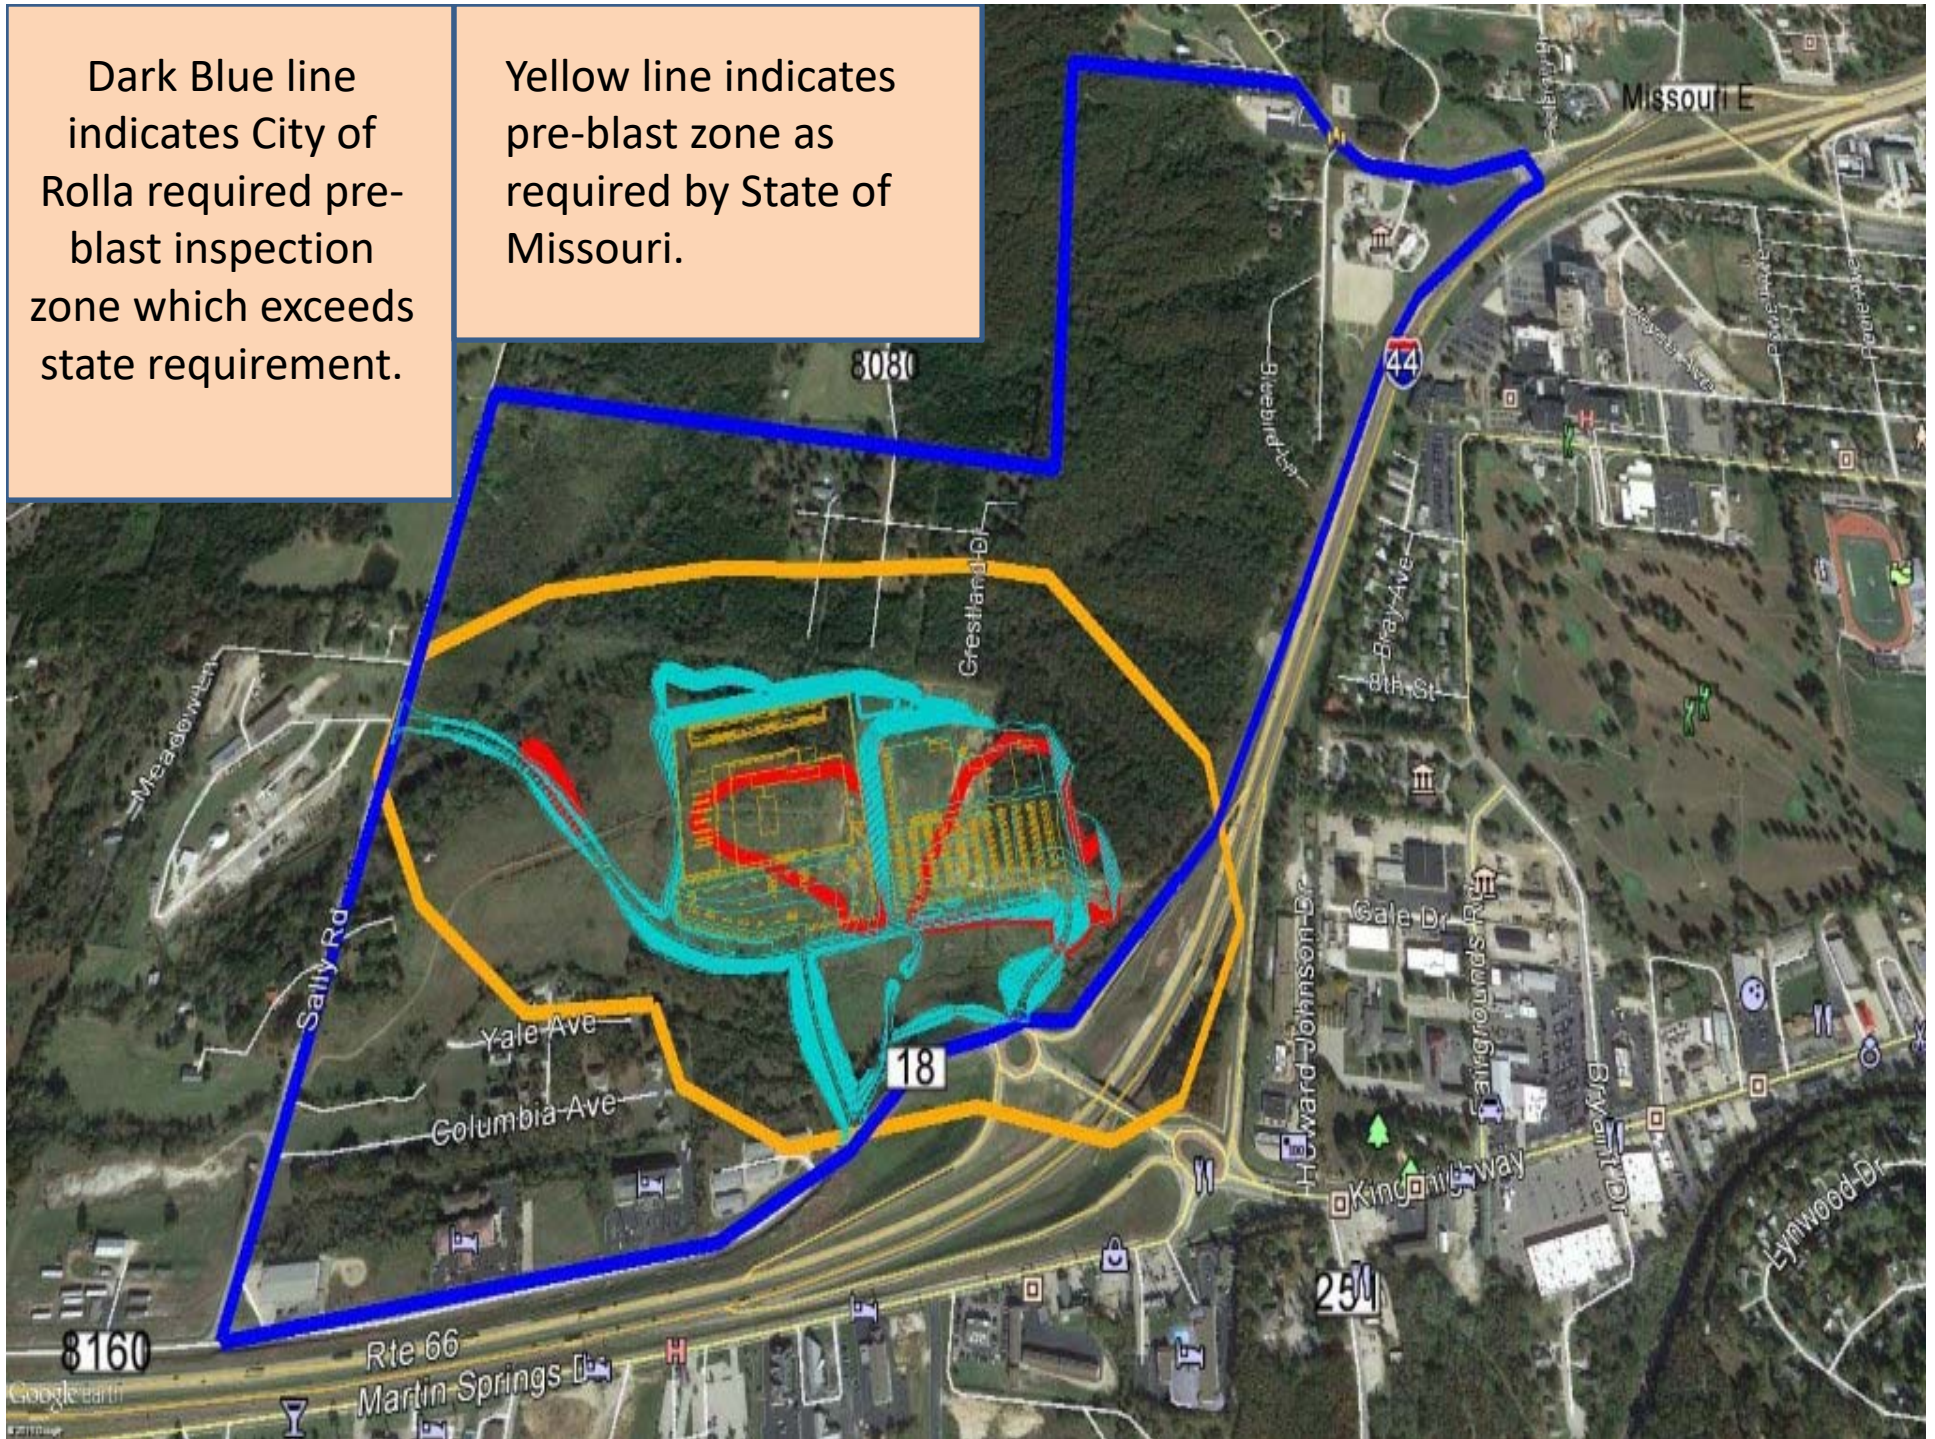

Creates a record of the condition of structures prior to blasting

Performed only with your permission and at contractor's expense

Dark Blue line indicates City of Rolla required pre-blast inspection zone which exceeds state requirement.

Yellow line indicates pre-blast zone as required by State of Missouri.

Informational Meeting February 16, 2017

PRE-BLAST INSPECTION PROCEDURES

A letter will be sent to all property owners within the designated radius, requesting that they call Vibra-Tech to schedule appointment.

If no response is received, a second letter will be sent certified mail, then a third letter will be left at the door.

Pre-Blast Inspection

Method of documentation
Will include digital photographs and audio description of interior conditions and defects performed room by room, wall by wall

Exterior conditions and defects are documented with digital photographs and/or video, including a photo mosaic
